

Integrated Solutions & Services, Inc in partnership with nationwide laboratories provides quality analytical services to clients in the environmental consulting/engineering, industrial, and governmental arenas.

Our team provides clients with quality analytical, as well as, value-added services such as customized sampling kits, pre-paid overnight shipping of samples to our laboratory, customized electronic deliverables, and access to your laboratory data in a PDF, ASCII or Excel file. Analytical instruments are directly linked to a laboratory information management system (LIMS), enabling electronic capture of all data required to produce analysis and quality assurance reports.

Accurate and defensible scientific information is obtained through the application of chemistry and a rigorous quality control program. The laboratory holds certifications in States coast to coast for environmental laboratory analysis, as well as being NELAC certified, AIHA accredited, and US Army Corps of Engineers MDR validated.

Capabilities

Through our partnership, we have the capability to analyze a variety of matrices, including: water, wastewater, soil, hazardous wastes, air, and industrial hygiene samples and provide comprehensive analytical services for:

- RCRA and CERCLA compliance testing for air, groundwater, soil, and waste characterization
- TCLP Analysis and Fingerprint Characterization
- Underground Storage Tank assessment as per state agency requirements
- Wastewater testing for NPDES and pretreatment agreement compliance
- Landfill groundwater and leachate monitoring
- Industrial hygiene air and wipe samples for OSHA and EPA compliance
- Priority Pollutants and stormwater run-off testing
- EPA Contract Laboratory Protocols (CLP)
- Industrial Hygiene/Air analysis

Federal Certifications and Additional Accreditations

- US Army Corps of Engineers, MRD Validations
- A2LA
- AIHA
- NELAC
